

SELECT THE BEST
LINE MARKING PAINT
FOR YOUR FIELD

Selectline is a premium brand of sportsfield line marking paints. With more than 30 years of experience developing and producing line marking paints we have become marketleaders in several European countries.

PRODUCTION AND QUALITY

As an international company Selectline has two laboratories where their own paints are being developed and production checked for quality. With multiple production facilities in Europe and Canada we can guarantee enough capacity to answer any customers needs.

We offer our distributors clear and valuable marketing support so we realize growth as partners.

We develop, produce and supply two groups of sportsfield line marking paints:

SLMIX

Concentrate with optimal whiteness due to high pigment content.

SLREADY

Ready to use and very low consumption.

LINE MARKING MACHINES

We also develop our own line marking machines. We supply the SL Liner, a high quality line marking machine which, due to its high pressure enables very low consumption of paint. We continuously innovate in order to connect with the clubs' or user's wishes. Follow us on Facebook or regularly check our website!

PREMIUM SPORTSFIELD
LINE MARKING PAINTS WITH
INTERNATIONAL FOCUS ON
QUALITY AND EASE OF USE

SLMIX

SL Mix is a line of premium concentrated line marking paints. The products distinguish themselves due to their whiteness, wear resistance and stability in the can.

PROPERTIES

- Concentrated: mix with water
- Optimum whiteness
- Very wear resistant
- Environmentally friendly
- Economical in use

APPLICATION

SL Mix needs to be diluted with water in a ratio of 1:4 to 1:8. The product can be applied with the SL Liner or most common standard line marking machines equipped with a flat tip nozzle.

General usage:

- Soccer: starting at 7 liters / field.
- Rugby: starting at 9.5 liters / field.
- American Football: starting at 24 liters / field.

GENERAL INFORMATION

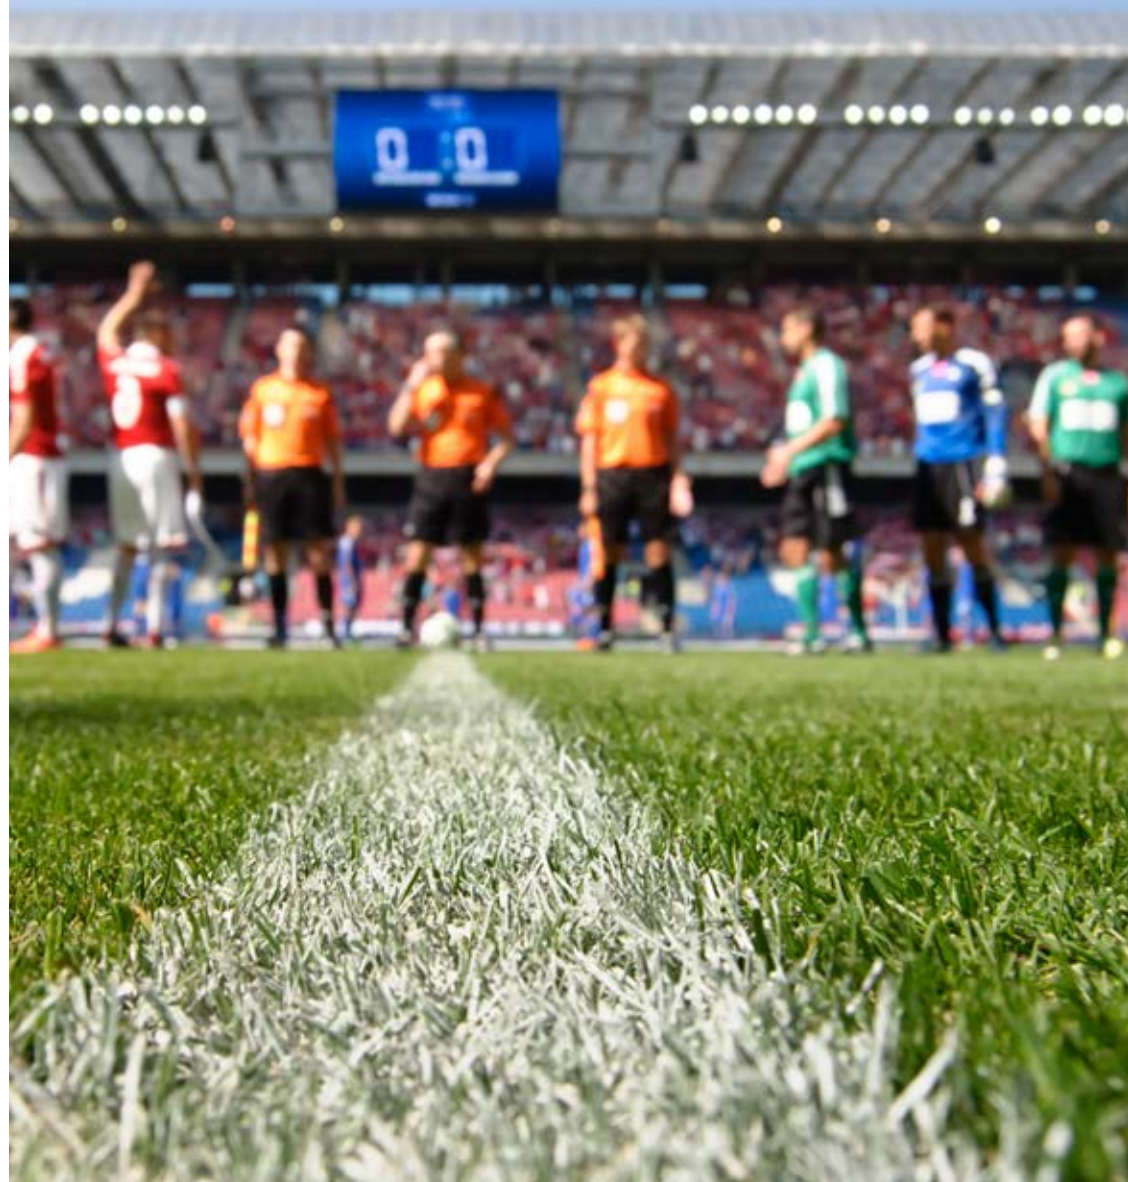

- Suitable for all sports that are played on natural grass.
- Usage and whiteness will depend on type of nozzle, pump pressure and walking speed.
- SL Mix is safe for the environment.

SLMIX

OPTIMUM WHITENESS DUE TO HIGH PIGMENT CONTENT

Choice of 3 versions:

SLMIX BUDGET

A low cost white line with good wear resistance.

SLMIX STANDARD

An excellent line, taking the budget into account, favored by amateur sports clubs.

SLMIX PROF

A very high quality line, optimum whiteness due to the highest pigment content, chosen by many of the professional and ambitious amateur clubs.

SLREADY

SL Ready is a ready-to-use sportsfield line marking paint that stands for quality and convenience.

A wear resistant white line straight from the can with ultra low consumption.

PROPERTIES

- › Ready-to-use: saves time and water
- › Superb coverage and wear resistance
- › Best price/quality ratio
- › Environmentally friendly
- › Economical in use

APPLICATION

SL Ready can be applied straight from the can with the SL Liner or a machine equipped with a pump generating over 3 bar (45 psi) and a suitable hollow-cone nozzle.

General usage:

- Soccer: starting at 2.5 liters / field.
- Rugby: starting at 3.5 liters / field.
- American Football: starting at 9 liters / field.

GENERAL INFORMATION

- Suitable for all sports that are played on natural grass.
- Whiteness will depend on type of nozzle, pump pressure and walking speed.
- SL Ready is safe for the environment.

SLREADY STANDARD

Ready-to-use: very user friendly
combined with the best results.

SLREADY

READY-TO-USE AND VERY ECONOMICAL

SL LINER

Selectline develops and supplies line marking machines that tie in perfectly with the properties of the range of Selectline paints. The SL Liner is a marking machine that is suitable for spraying concentrates (SL Mix) as well as ready-to-use products (SL Ready).

The SL Liner distinguishes itself by the use of premium quality materials:

- A heavy duty frame to improve straight tracking ability;
- Minimum use of synthetic materials;
- High operating pressure: Guaranteed spray results;
- Heavy duty battery to increase operating time;
- Smart charger for optimum charging of the battery;
- White powder-coat to protect against rust and also hides overspray;

EASE

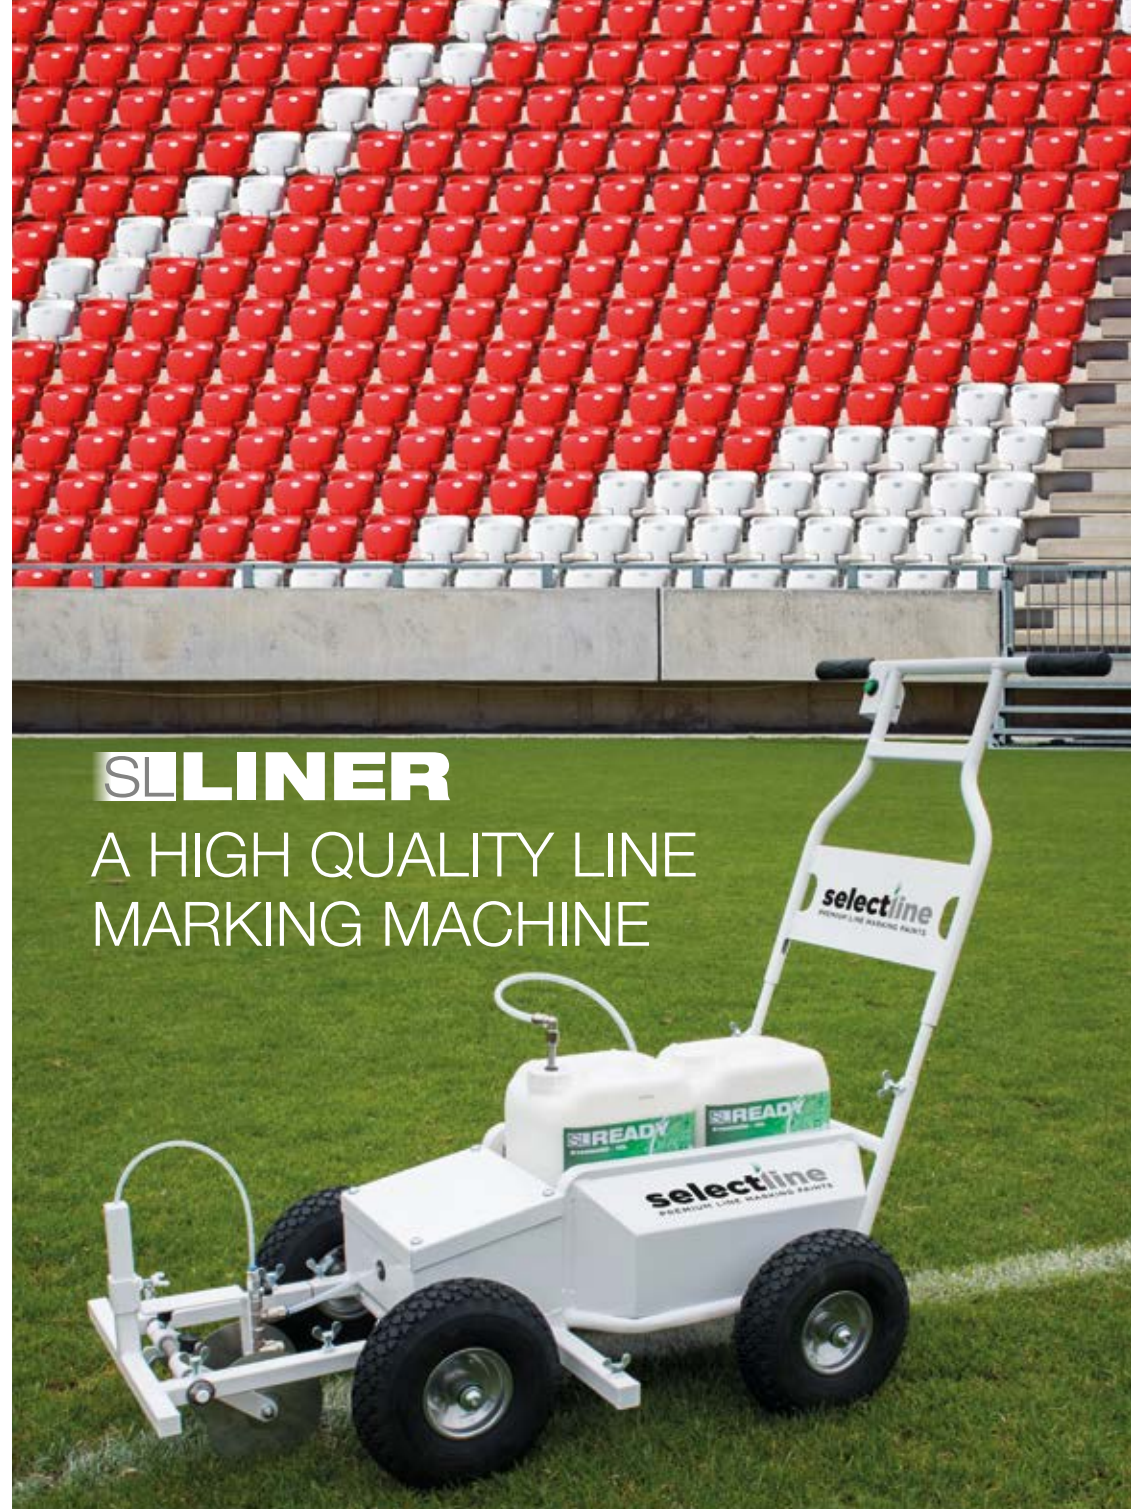

Every operator has his or her own preferences. SL Liner can accommodate to all. SL Liner is suited for spraying straight in front as well as off to the side of the machine. The spray-parts are easily removable to be mounted on the side of the machine. Additionally the spray-parts, if mounted in front of the machine, can easily be raised or lowered to ze the view of the line for the operator.

USE

SL Liner is suited to spray all available paints in the Selectline assortment. It is important to match the spray nozzle to the type of paint used. Amount of product used and whiteness of the line depends on the mixing ratio (SL Mix), nozzle used and walking speed.
